

WYSIWYG Custom Field Type SugarCRM Module

Developed to use with SugarCRM.

This project is in no way affiliated with SugarCRM.

Developed by: David Boris
Version: 1.0 Beta
Created Date: 10/23/2010

Overview

Want WYSIWYG/HTML Editor available in any module? As many as you want? Here is the custom field type which gives you the opportunity!

This plug-in gives you an opportunity to create custom WYSIWYG/HTML Editor field type to save formatted text. Aha! The plug-in is Upgrade SAFE!!!

This custom field is available in studio and in module builder too.

WARNING: If you un-install or disable plug-in the saved content will appear with HTML Tags.

How to install?

Download plug-in from <http://www.sugarforge.org/projects/wysiwyg/> from downloads tab.

Install plug-in using Module Loader, Admin > Module Loader.

After successful installation, the custom field appears in studio and module builder too.

The screenshot shows a dialog box titled "Edit Field" with a close button (x). At the top, there are "Save" and "Cancel" buttons. The main area contains the following fields:

- Data Type:** WYSIWYG (dropdown menu with a help icon)
- Field Name:** wysiwyg
- Display Label:** WYSIWYG
- System Label:** LBL_WYSIWYG
- Help Text:** (empty text box)
- Comment Text:** HTML Editor

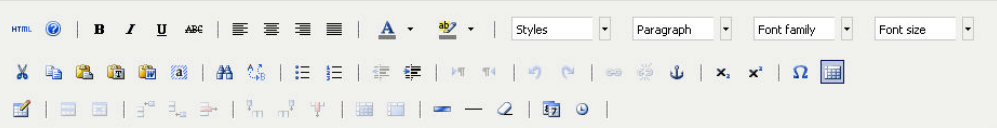

At the bottom of the dialog, there are two buttons: "Sugar Portal Editor" and "Dropdown Editor".
