Overview

Fab tools, is a project, which will have various small, yet very useful extensions for your SugarCRM system.

Core objective of this project, is to get a small idea from community or existing clients, create a full fledged functionality and contribute to community, so that people having similar requirement can use.
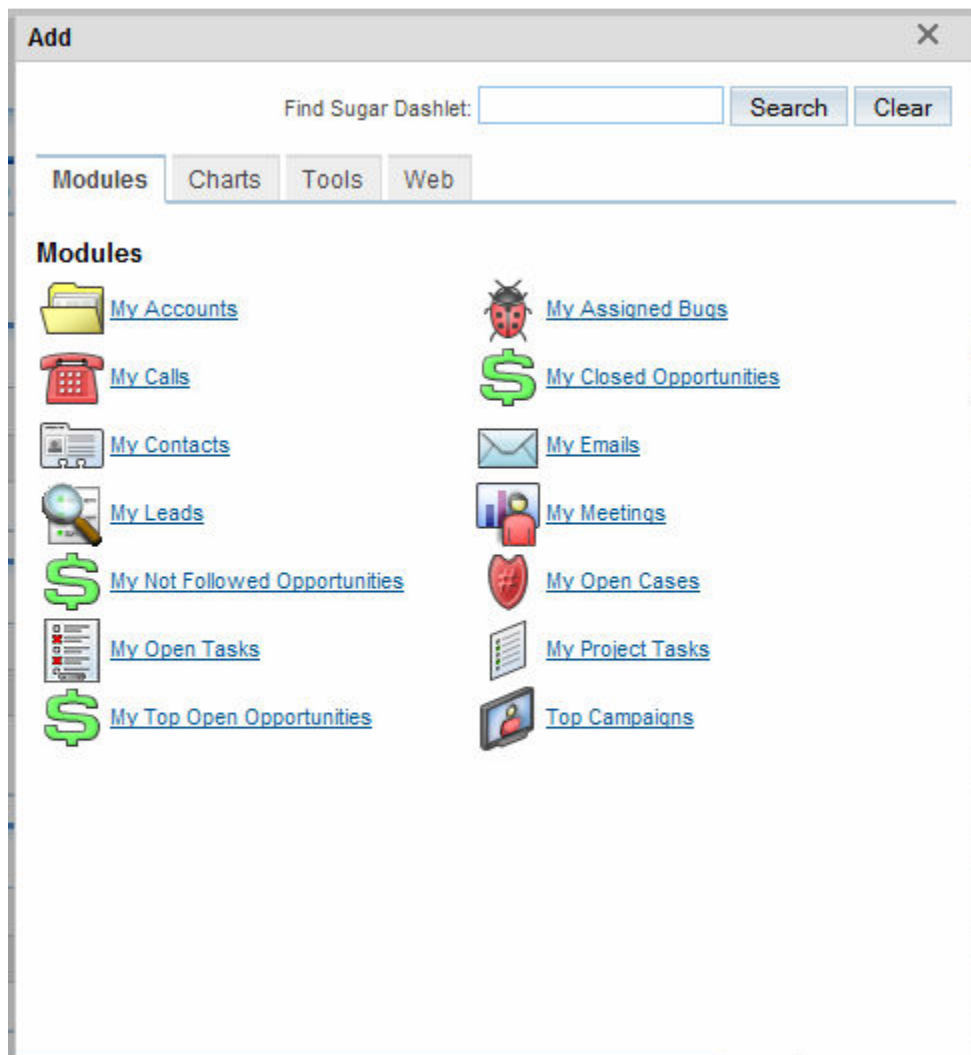

To start away with the idea, taken from this thread http://www.sugarcrm.com/forums/showthread.php?t=69190 on Sugar Forums, here is the dashlet which gives you the overview of the Opportunities which has not followed since last 6 months.

How to install?

Download plug-in from http://www.sugarforge.org/projects/fabtools/ from downloads tab.

Install plug-in using Module Loader, Admin > Module Loader.

After successful installation, you will see new Dahslet in Add Dashlet popup on Home Page.

Following is the dashlet, which has demo data for reference, which has no activities (Call/Meeting/Task/Email) for past six months.
